GEM Arctic 2019

CCGS Louis S. St-Laurent

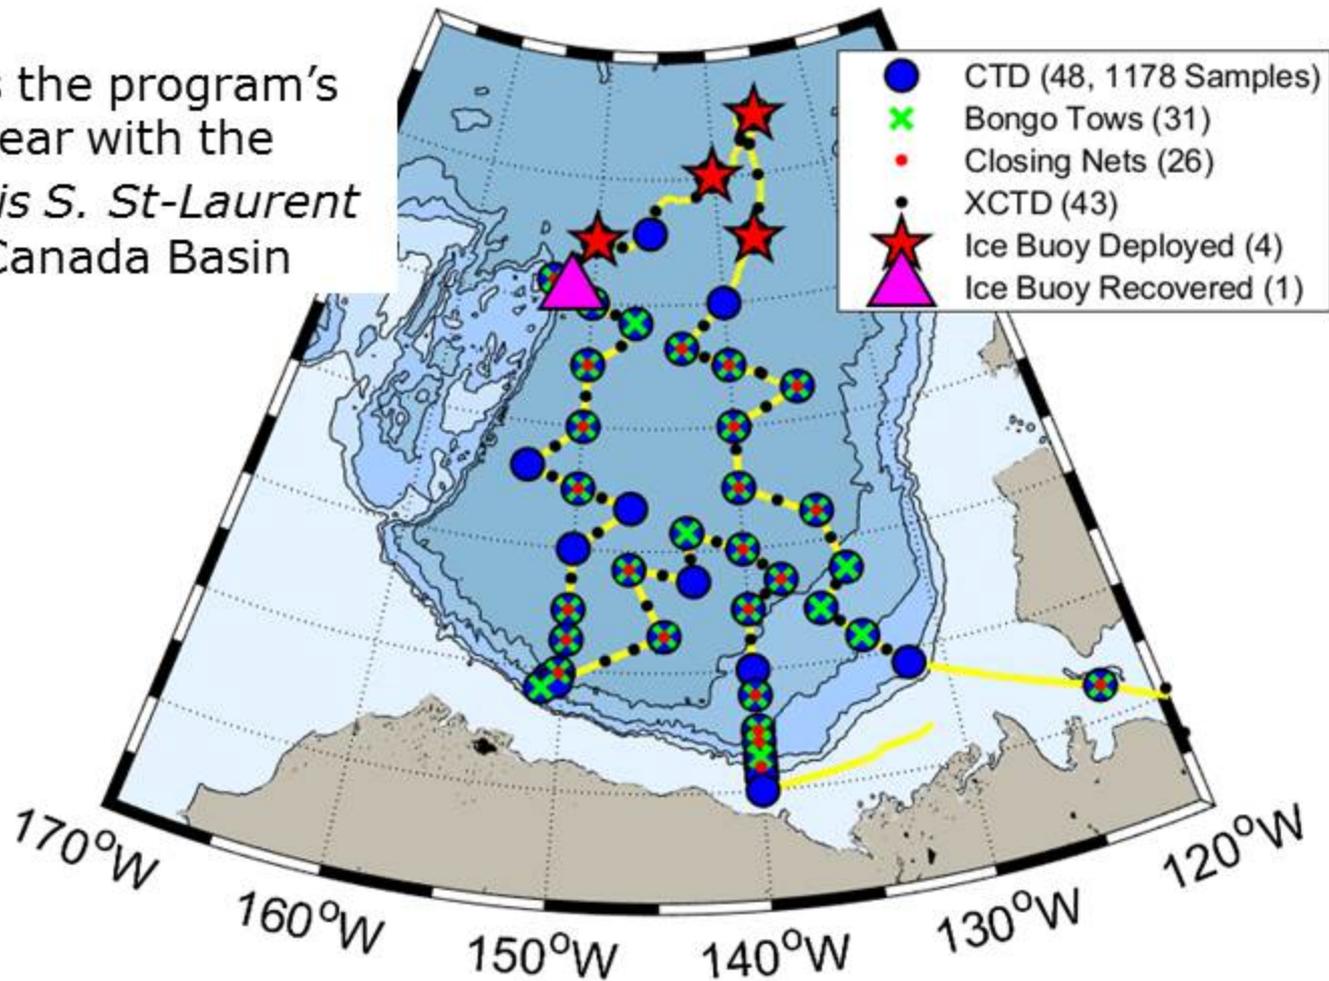

GEM Arctic 2019

CCGS *Louis S. St-Laurent*

JOIS - AON-BGOS

12 Sept – 04 Oct 2019

2019 was the program's
17th year with the
CCGS Louis S. St-Laurent
in the Canada Basin

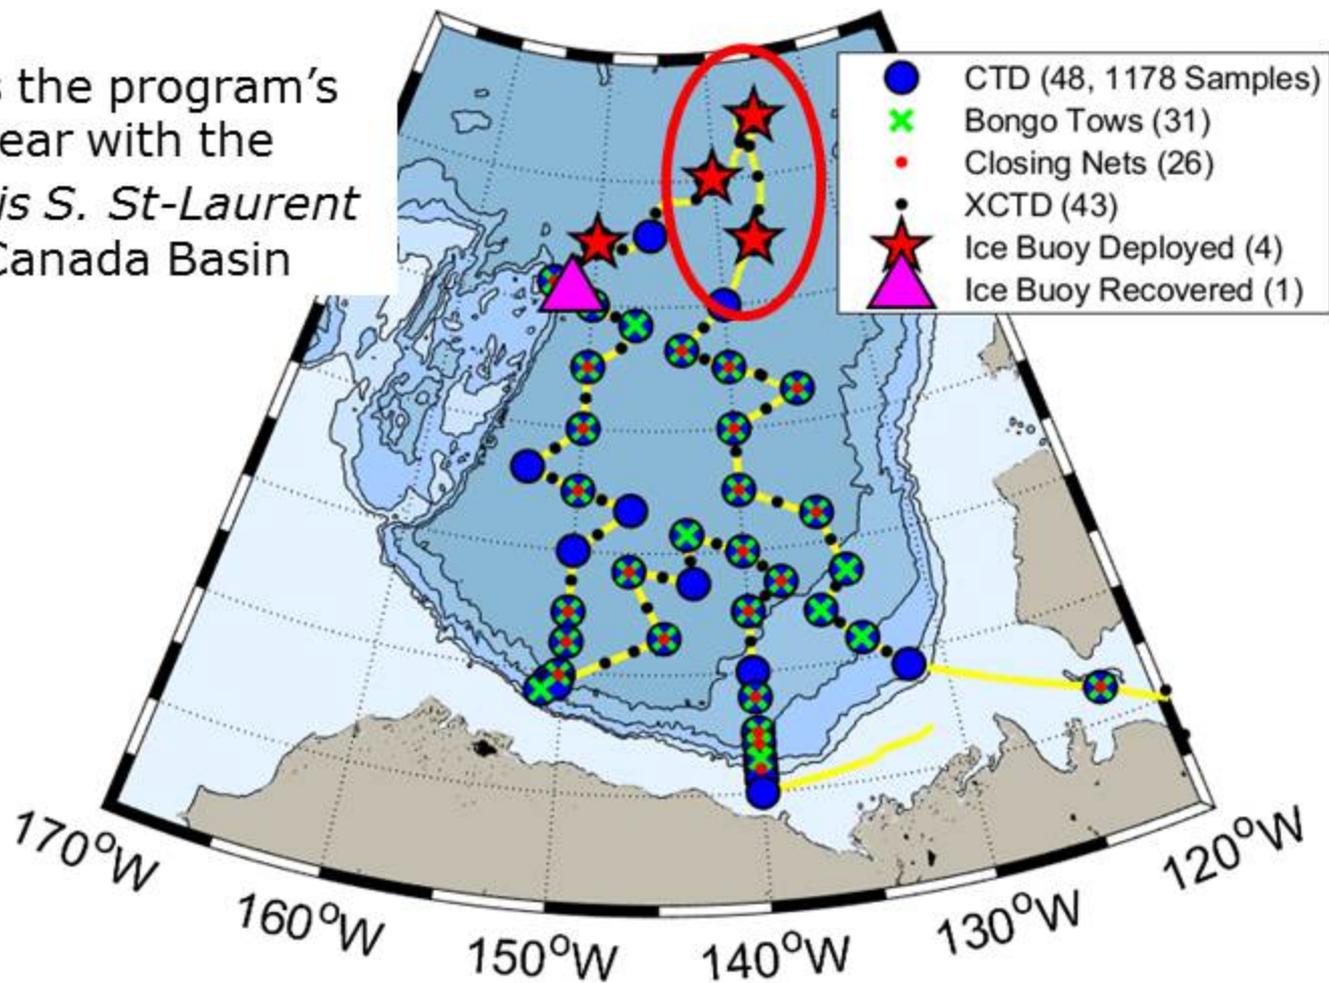

CCGS *Louis S. St-Laurent*

JOIS - AON-BGOS

12 Sept – 04 Oct 2019

2019 was the program's
17th year with the
CCGS Louis S. St-Laurent
in the Canada Basin

CCGS Louis S. St-Laurent

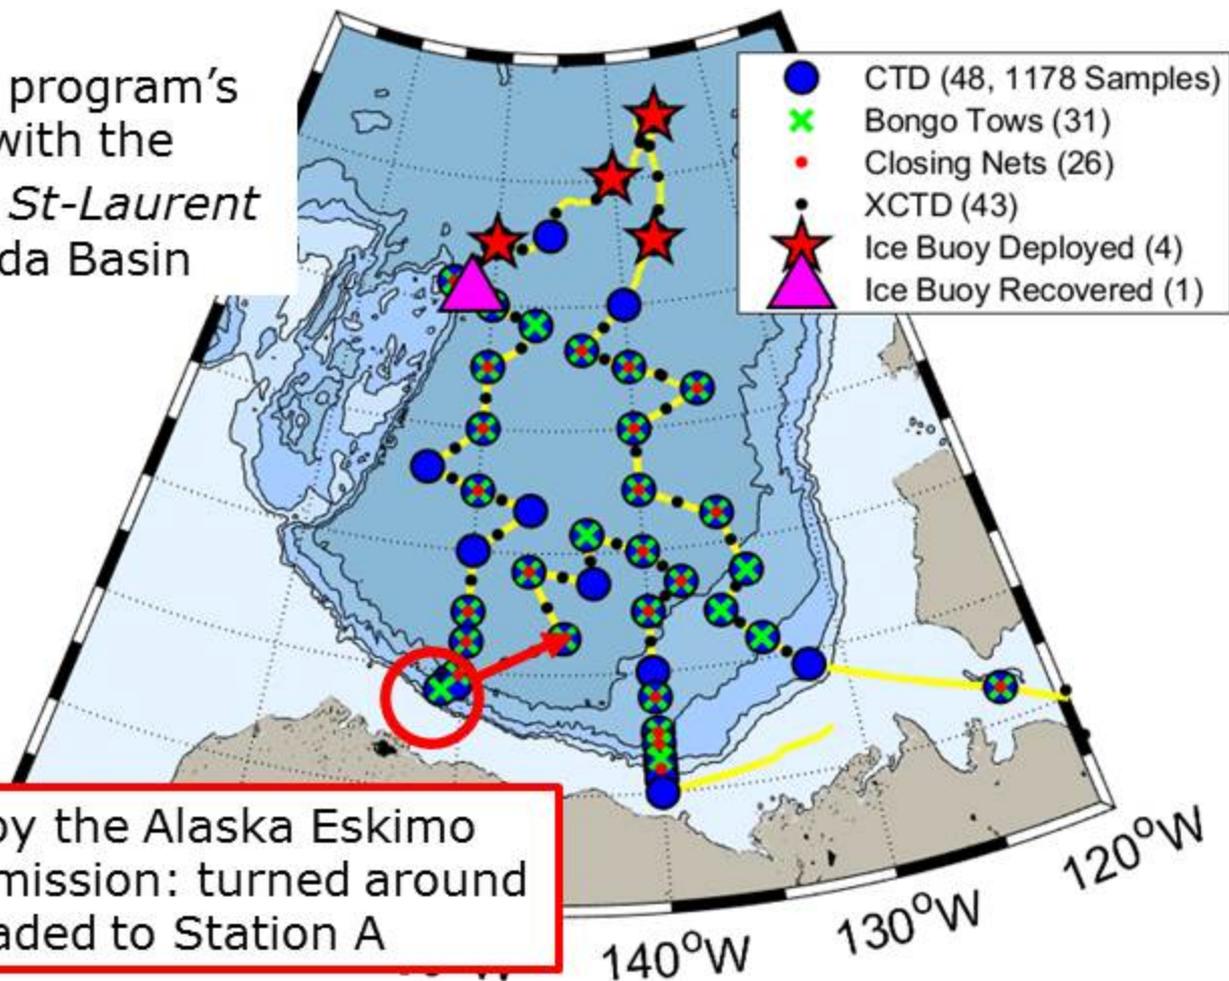

Large flows of level ice in the north.

CCGS *Louis S. St-Laurent*

JOIS - AON-BGOS

12 Sept – 04 Oct 2019

2019 was the program's
17th year with the
CCGS Louis S. St-Laurent
in the Canada Basin

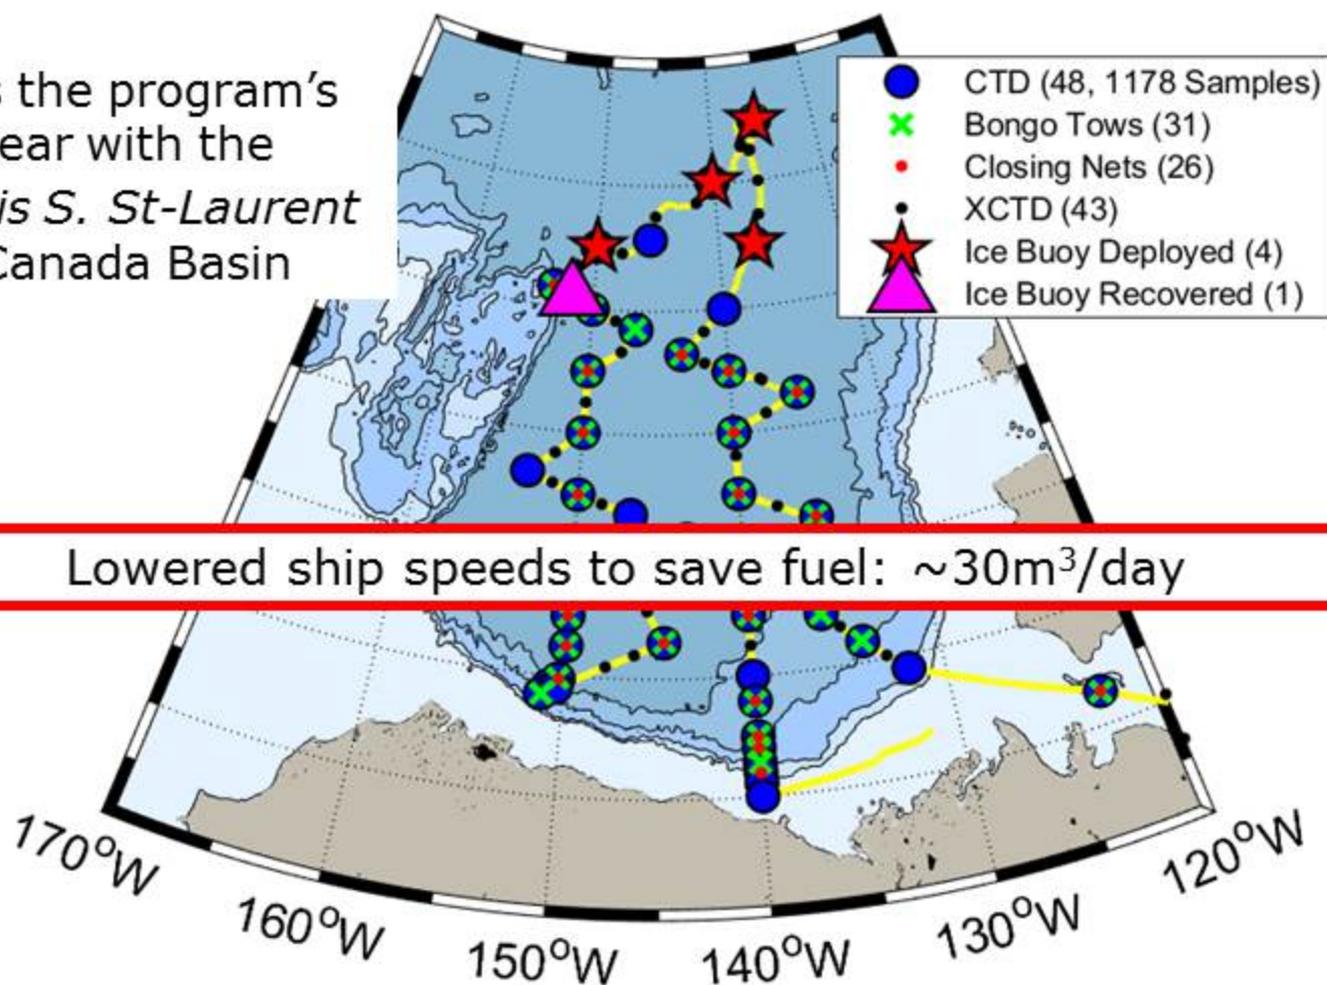

Contacted by the Alaska Eskimo
Whaling Commission: turned around
and headed to Station A

CCGS *Louis S. St-Laurent*

JOIS - AON-BGOS

12 Sept – 04 Oct 2019

2019 was the program's
17th year with the
CCGS Louis S. St-Laurent
in the Canada Basin

Joint Ocean Ice Studies & Beaufort Gyre Observation System 2019

CCGS Louis S. St-Laurent | September 10th – October 4th, 2019

Roy Lockyer (CCGS Louis S. St-Laurent)

CCGS Sir Wilfrid Laurier

Transit to the Arctic across the NE Pacific: C3O, DBO

6 days for science, 16 scientists

- U-CTDs during transit
- CTD/Rosette, ADCP, bongo net casts across the Gulf of Alaska.
- underway seawater sampling
- deployment of 5 Argo floats
- onboard incubations to estimate primary productivity

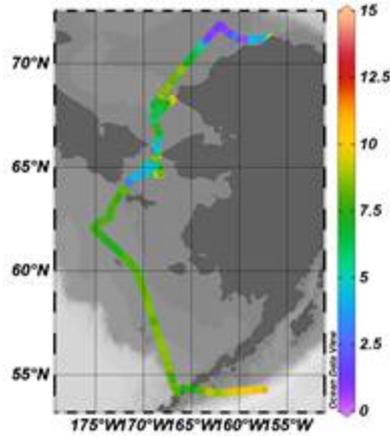

board 12 scientists in Dutch Harbor for DBO

- sediment sampling using VanVeen grabs & Happs corer
- CTD & water sampling with the rosette
- vertically towed bongos.
- seabird and marine mammal observation
- onboard incubations to estimate primary productivity
- **Addition of CPR!**

Underway data, 5m intake:

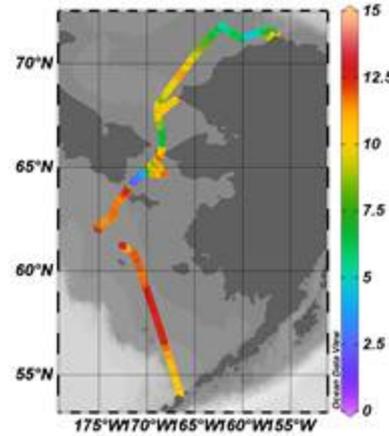

2018

Temperature, 2 [ITS-90, deg C]

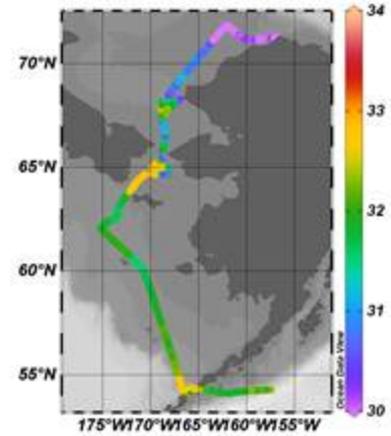

2019

DBO5 – Barrow Canyon

CCGS Sir Wilfrid Laurier (Arctic Leg 3)

Marine Hazards ... Ocean Monitoring

25 Sep – 10 Oct 2019

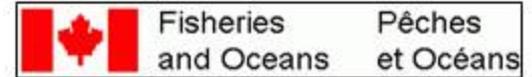

21 oceanographic moorings to be recovered, 16 to be deployed

Continuous near-surface temperature & salinity

1 oceanographic section, CTD only: DBO-8; 2 CPR tows, each 550 mi

Organic contaminants sampling – air & seawater

Bottom mapping by multi-beam sonar - opportunistic

Chief Scientist

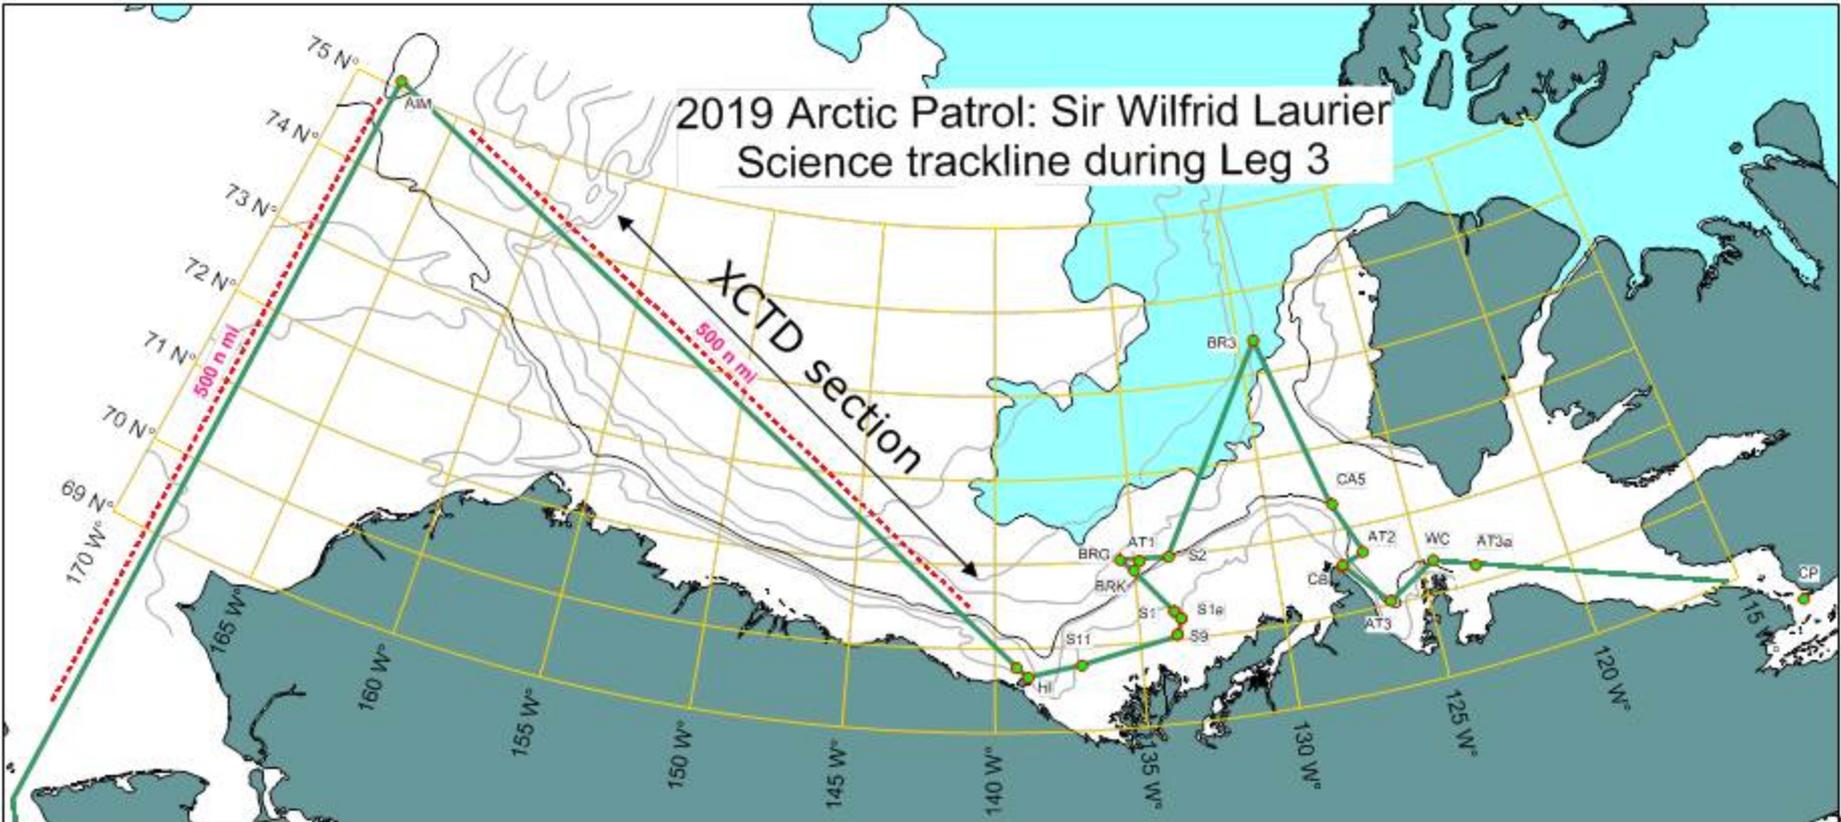

Humfrey Melling, DFO at IOS

Collaborators

ArcticNet, ASL Env Sci, ECCC, CHS, NOAA, Stantec

Supported by

PERD, ASL, OPP

Year-round data document marine climate: Norms, natural variation, extremes, progressive change

Sea ice

Thickness, drift, hazardous features

Sea surface

Storm waves, storm surge

Ocean current – surface to seabed

Seawater pathways (e.g. nutrient delivery, pollutant dispersal), dangerous currents

Ocean water masses – temperature, salinity

Identify properties, origins of seawater

Sediment in seawater

Suspension, transport & deposition

Organic contaminants in seawater

Biological enhancers

Nutrient upwelling, zooplankton variation

Ambient sound

Mammal's vocalization, species presence, natural sound, seismic surveys, ship noise

***F/V Frosti*: 41m commercial fishing trawler**

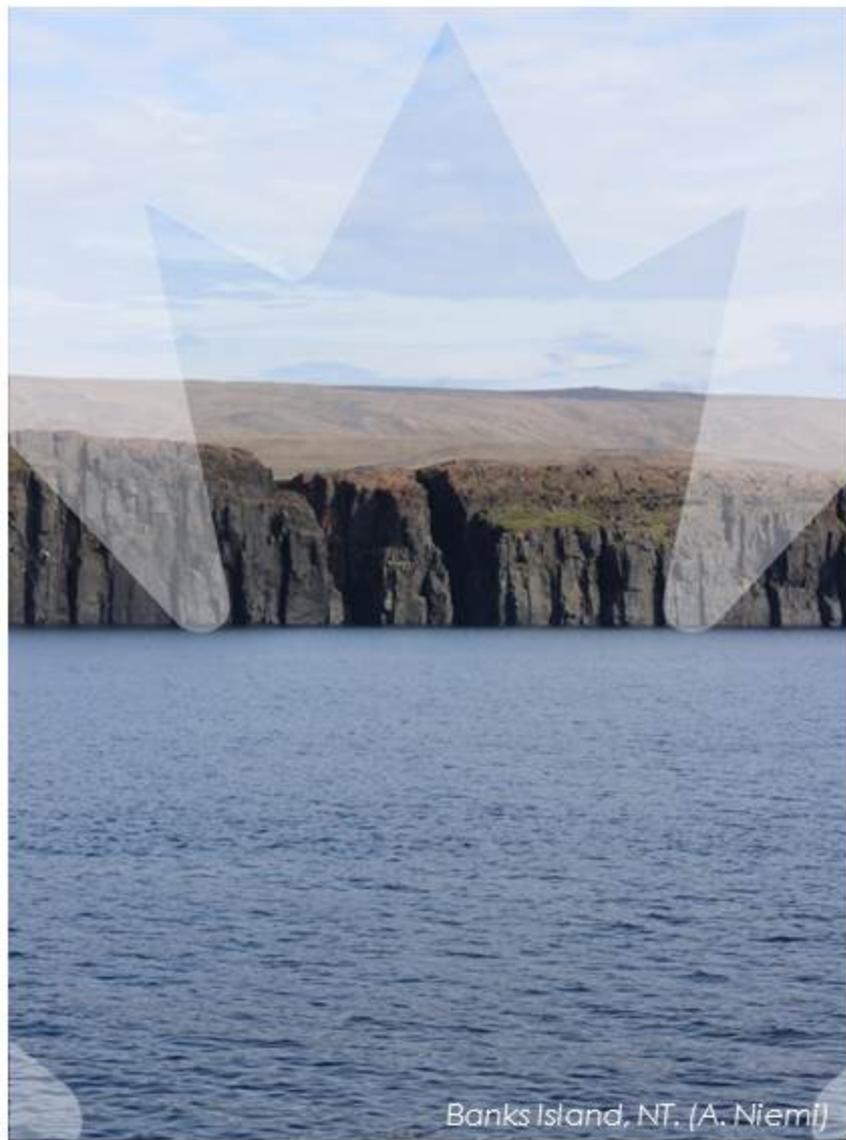

Canadian Beaufort Sea Marine Ecosystem Assessment (CBS-MEA)

**Science in support of a changing
Beaufort Sea ecosystem**

DFO Leads: A. Majewski, A. Niemi,
J. Reist and R. Young

Banks Island, NT. (A. Niemi)

Project approach

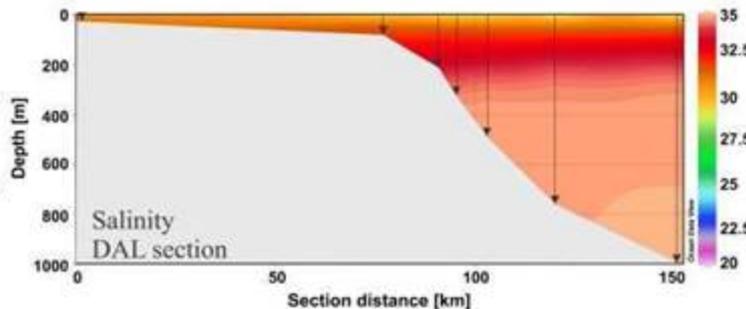

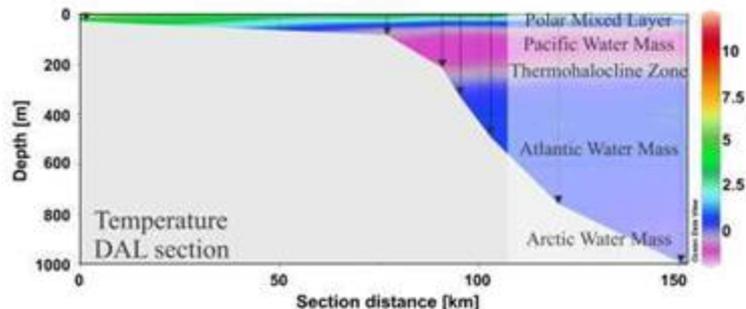

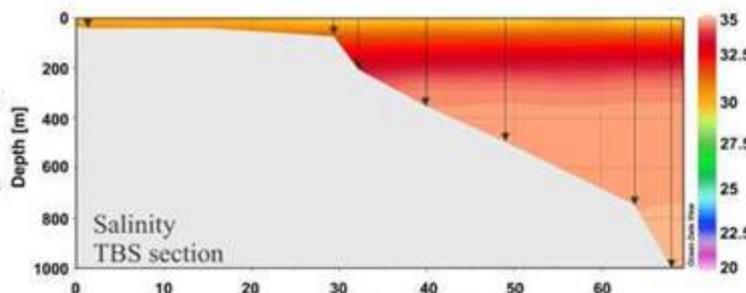

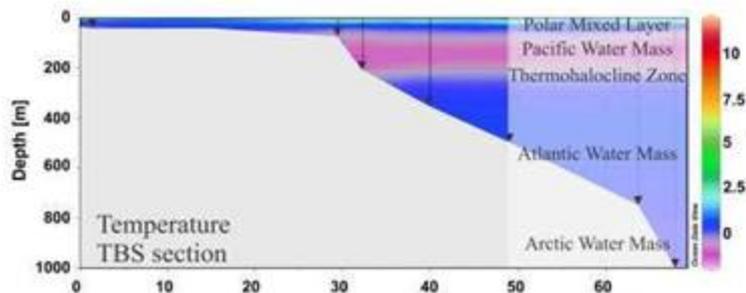

- Multidisciplinary science team consisting of DFO, University and Community partners
- Off-shore, ship-based sampling - physical, chemical and biological (bacteria to bowheads) data collection
 - Linked mooring program (Niemi)
- Real-time ecosystem integration
- Complementary nearshore/coastal work included in the study area

Water-column sampling

CTD-Rosette:

- Temperature, salinity, and other water properties will be measured to identify water mass habitats for fishes, plankton, and benthic invertebrates

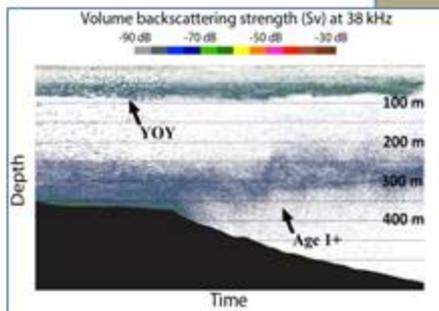

Water-column profiles of temperature and salinity on the CBS shelf and slope

Water-column sampling

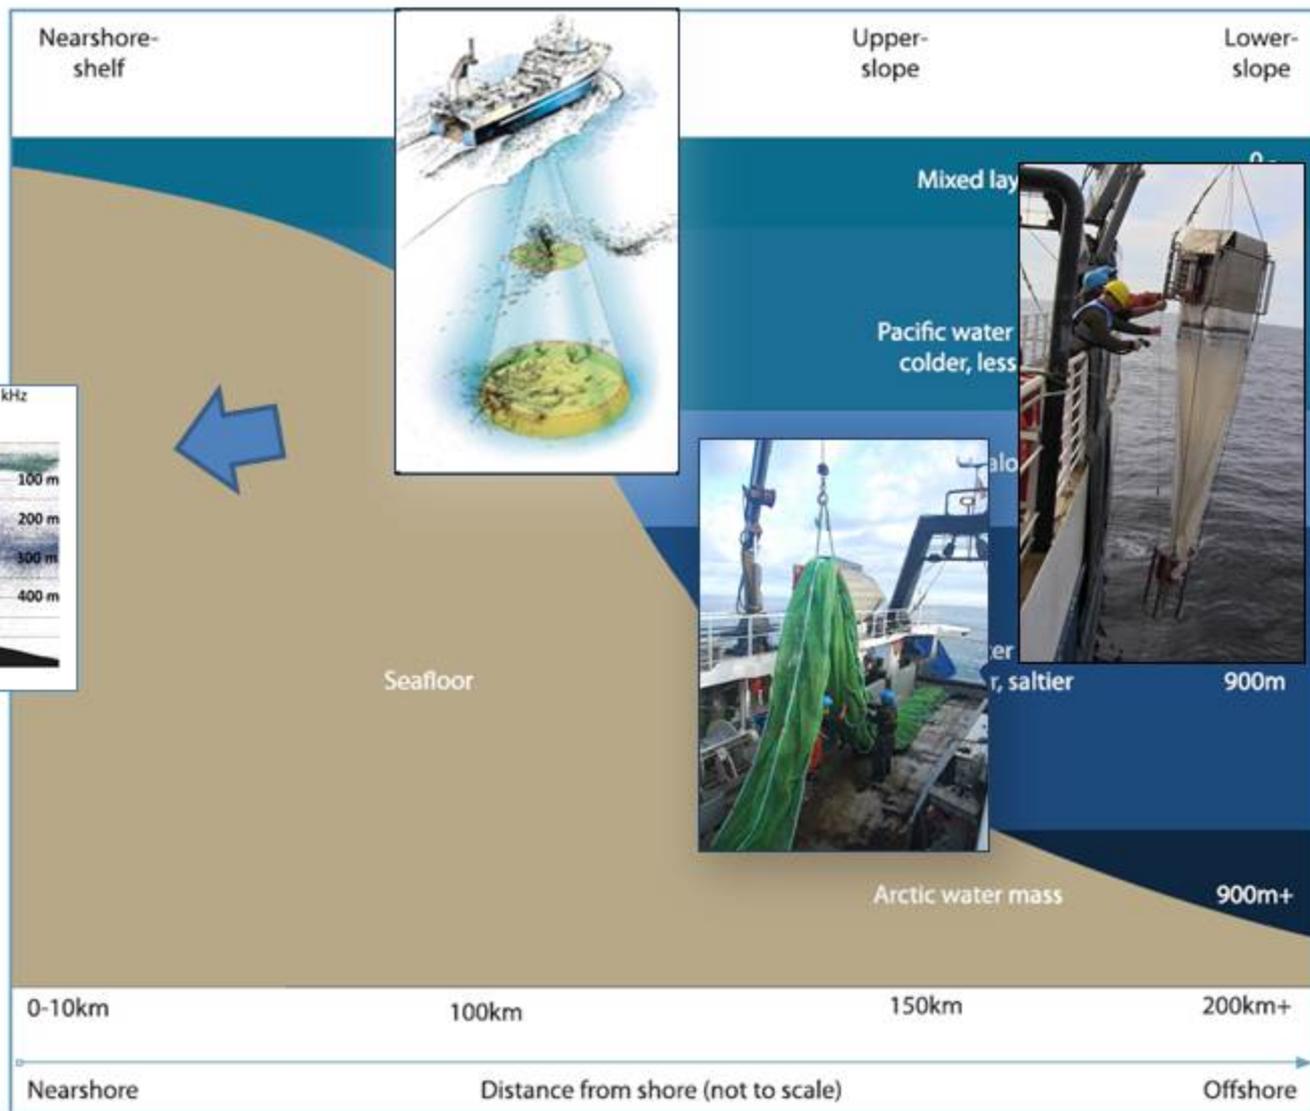

Hydroacoustics:

Ship-mounted hydroacoustics provide a picture of where the fish and plankton are in the water column

Mid-water nets:

Mid-water trawls and plankton nets will identify the species that live within different water masses

Bottom sampling

Box-core and beam trawl:

- Document bottom-type (e.g., mud vs. gravel) where fish and invertebrates are sampled
- Sample the communities of invertebrates (fish & MM food) living within the sediments and on the sea floor

Box Core

Invertebrates in the sediments

Bottom Trawling

Invertebrates on/near bottom

Bottom sampling

Small beam trawl

- Catches small bodied fishes
e.g., sculpins, lumpsuckers, snailfishes
- Extend coverage from CCGS *Nahidik*
- Allows comparisons with Alaskan data

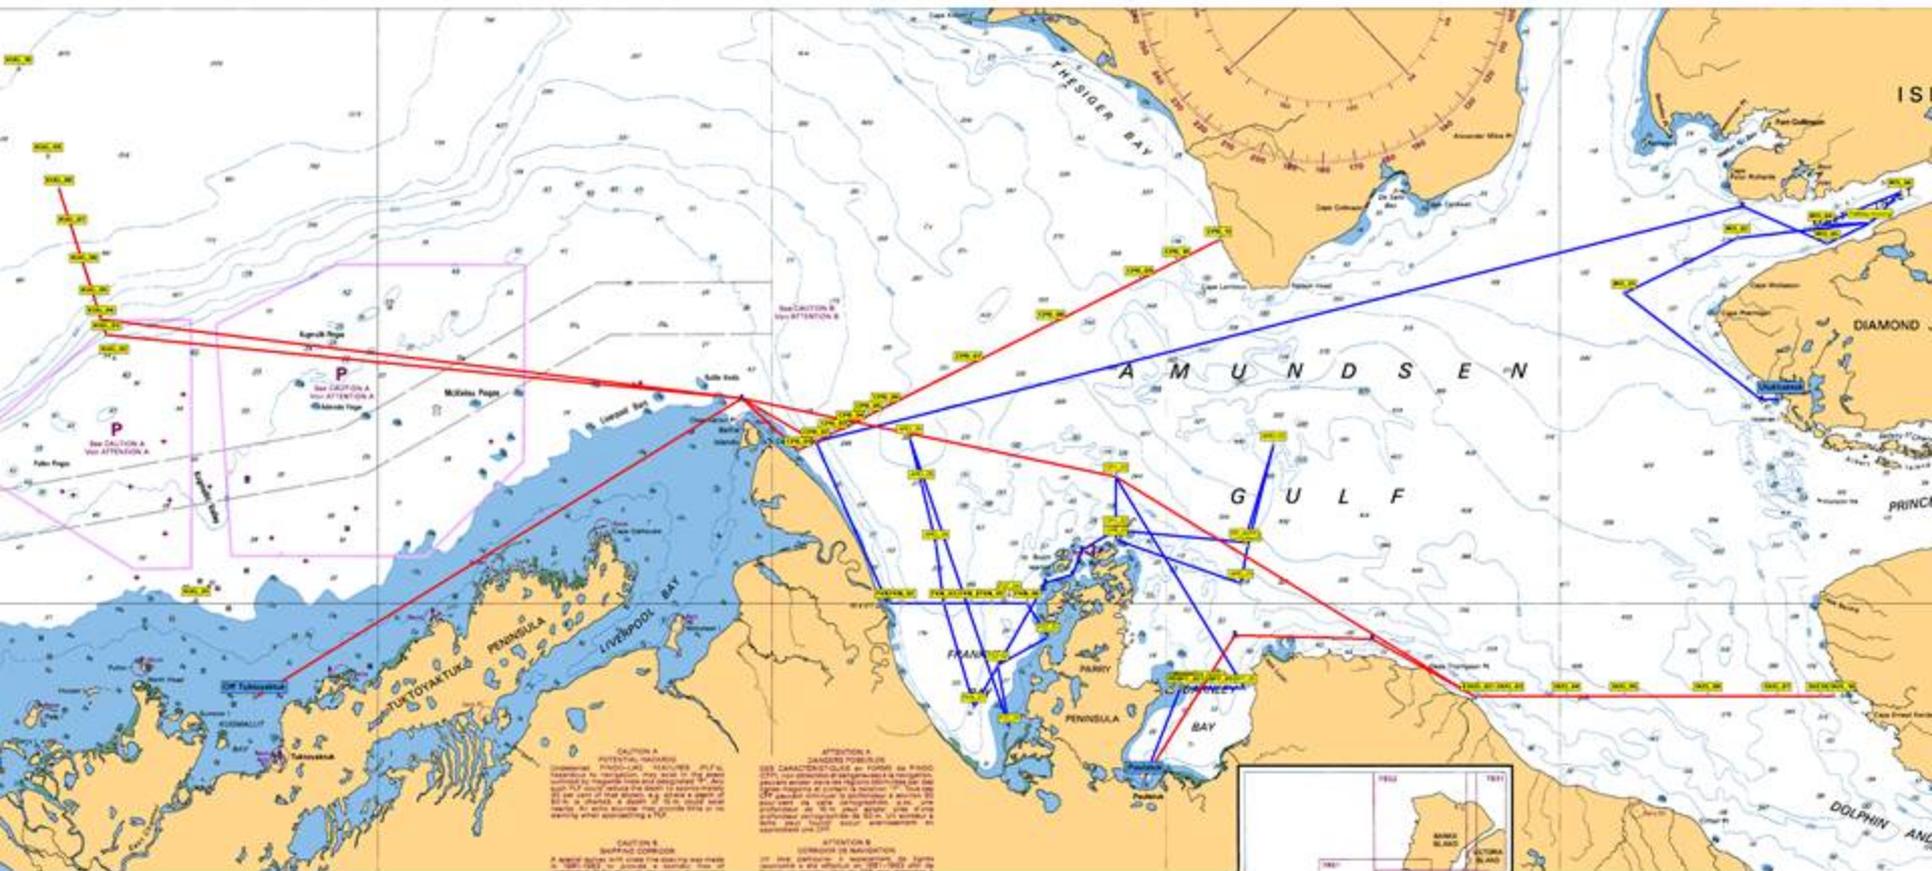

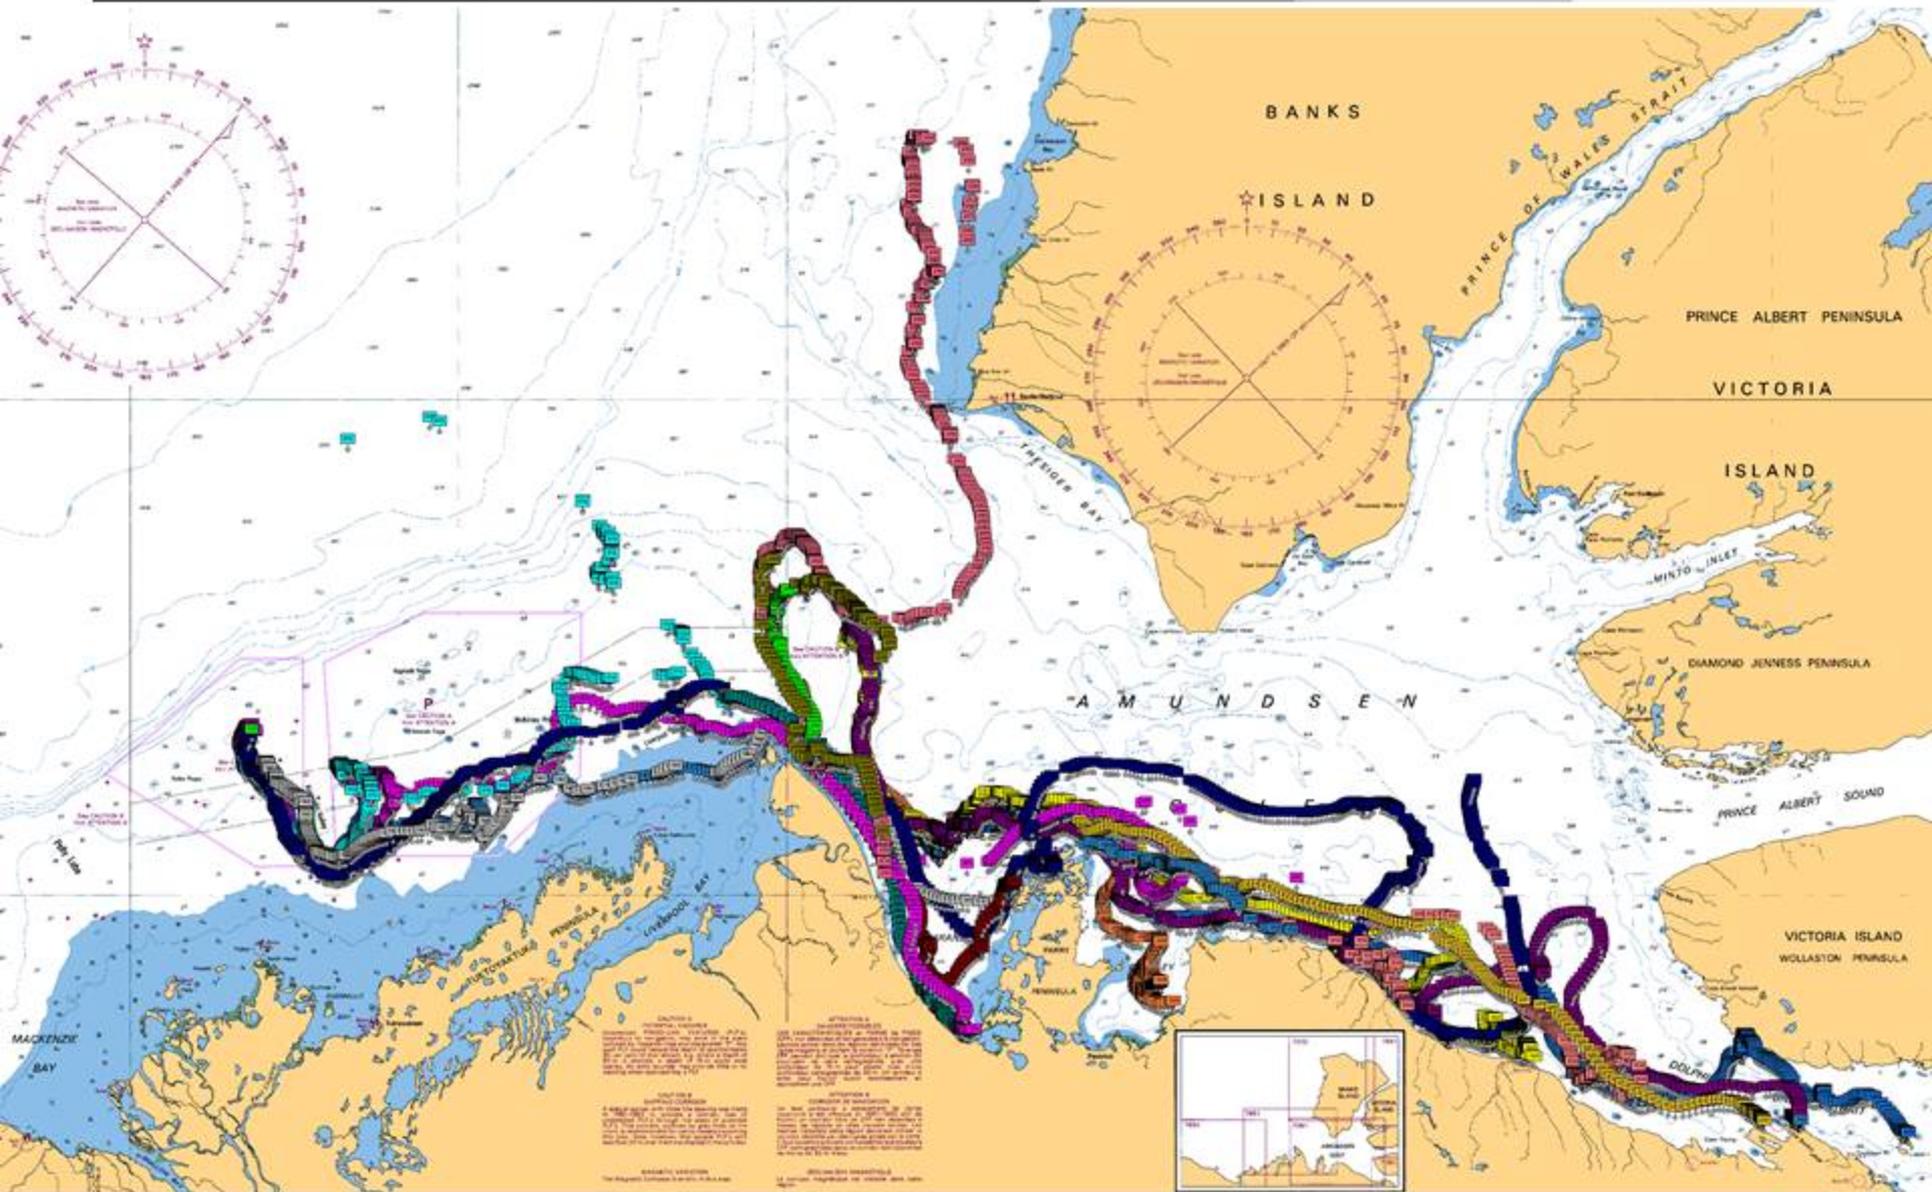

Larger bottom trawl

- Catches a broad spectrum of species & sizes including larger, faster fishes.

e.g., flatfishes, skates

R/V Martin Bergmann

19-m coastal research vessel

6 scientists

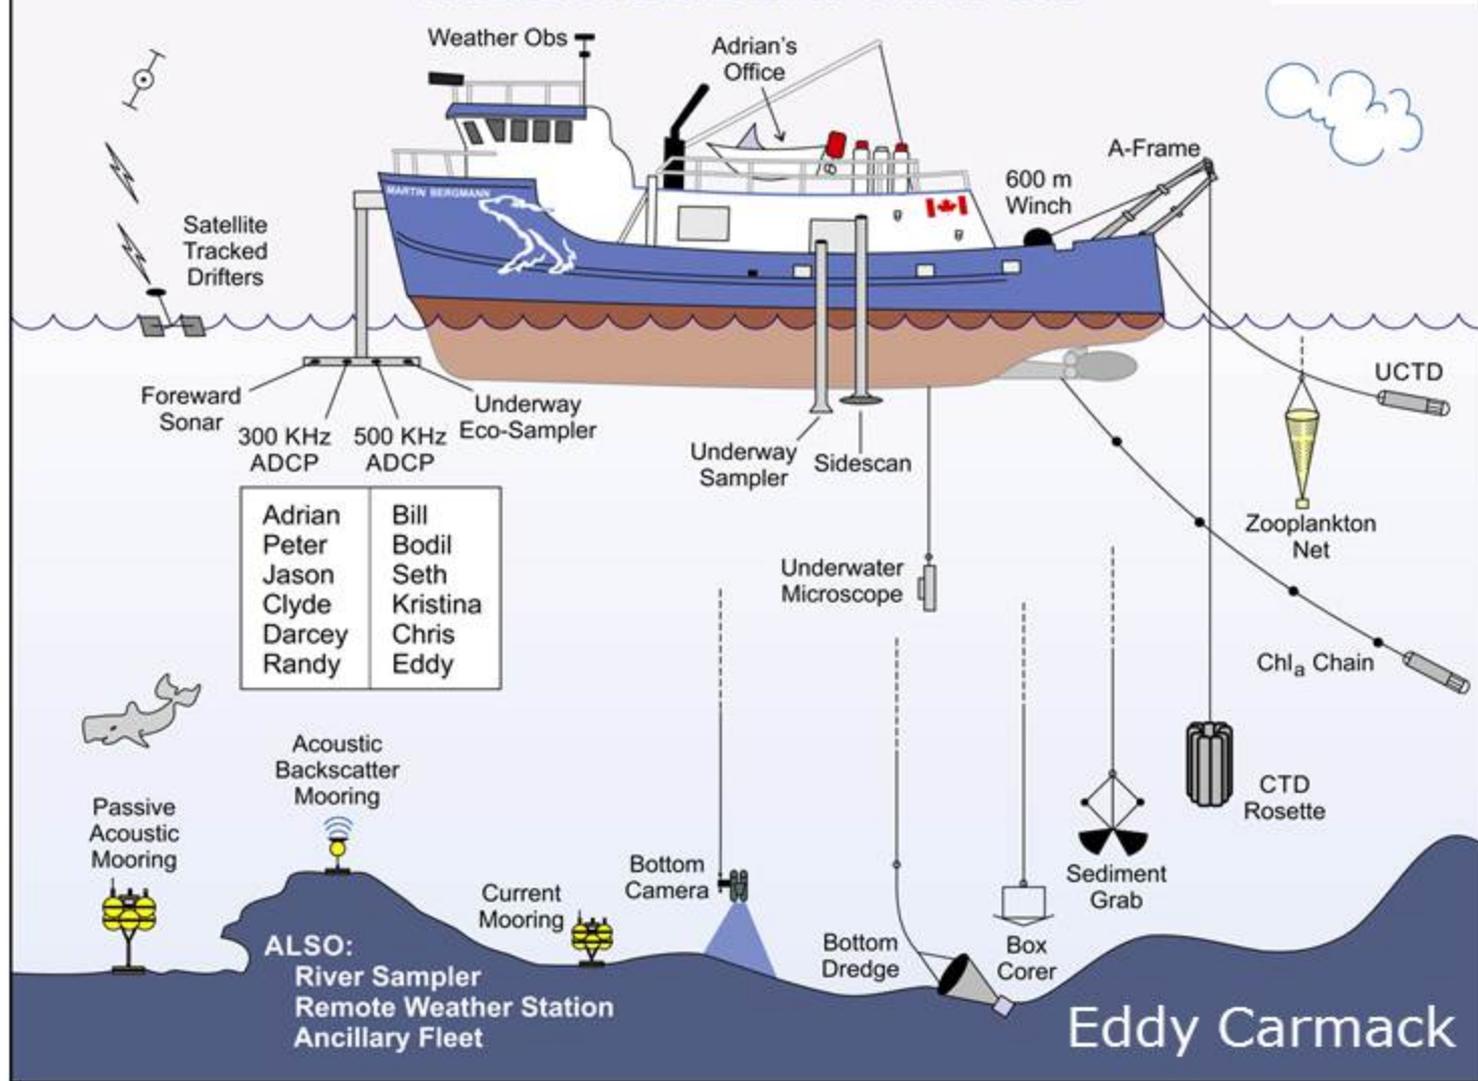

Based in Cambridge Bay, NU

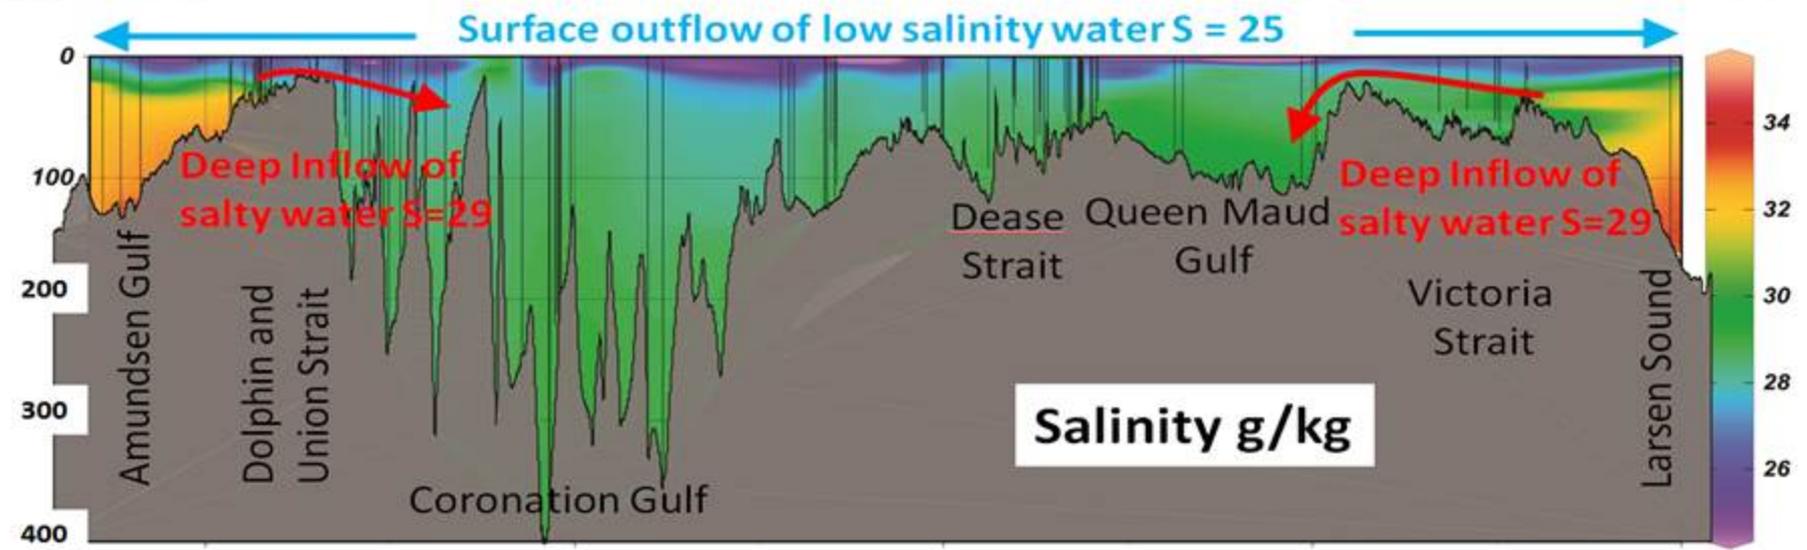

ARCTIC
RESEARCH
FOUNDATION

R/V *Martin Bergmann*

THE LITTLE BOAT THAT DID

Ecological Research & Monitoring in the Kitikmeot Sea

RV Martin Bergmann's home base is Cambridge Bay:

Operated by the non-profit Arctic Research Foundation

Northern anchorage permits immediate start when local ice clears in late July

Supports initiatives of DFO, ONC, OTN, Polar Knowledge Canada, UVic, UAF, UiT, MEOPAR

Ocean moorings:

Submerged instruments monitor ocean current, salinity, temperature, PAR, DO, acoustic backscatter, underwater sound, light. Year-round operation. (DFO, ARF, Polar Knowledge Canada)

Submerged listening stations track char during summer feeding at sea operated by Ocean Tracking Network (OTN)

Cabled observing station in Cambridge Bay:

Operated as a test-bed cabled observatory by Ocean Networks Canada (ONC)

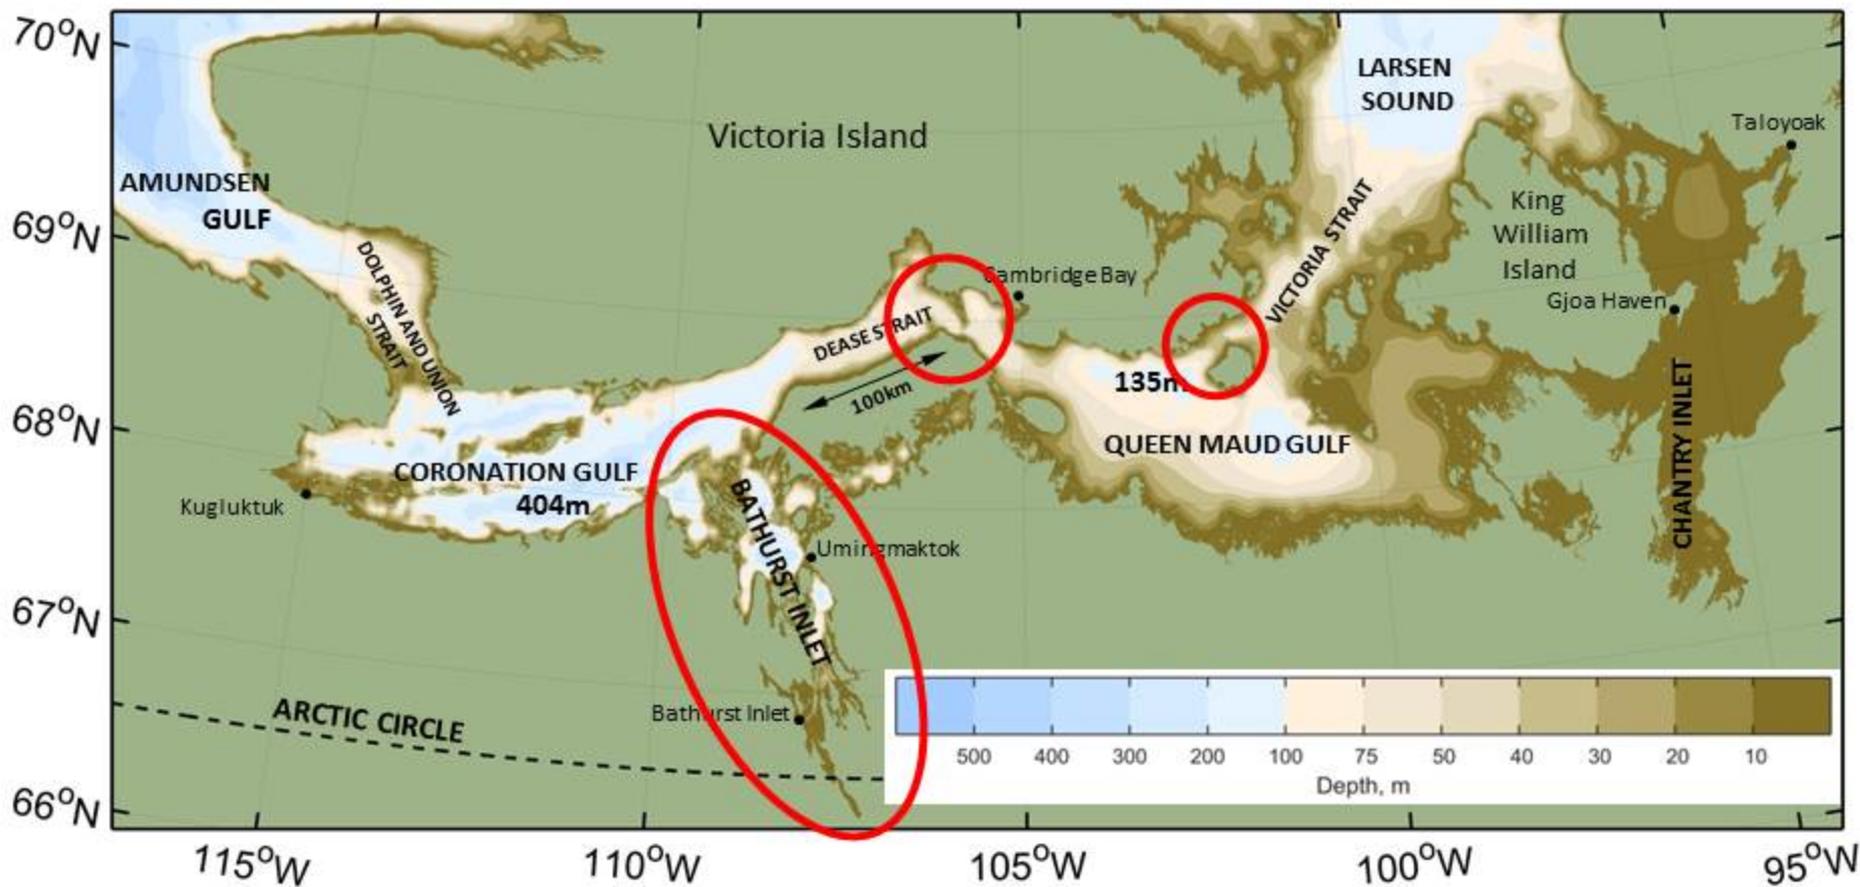

Reference oceanographic transects:

Temperature, salinity, fluorescence, DO, turbidity measured from *R/V Martin Bergmann* in August & from the ice surface in March by the Canadian Rangers (CROW)

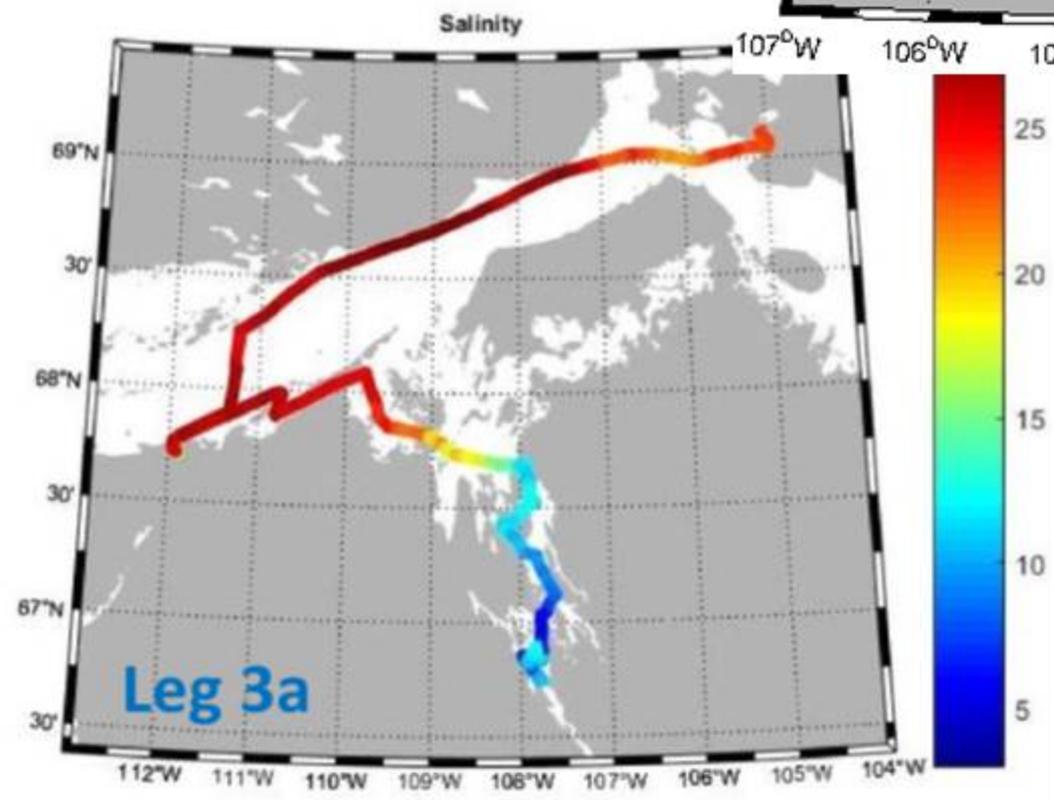

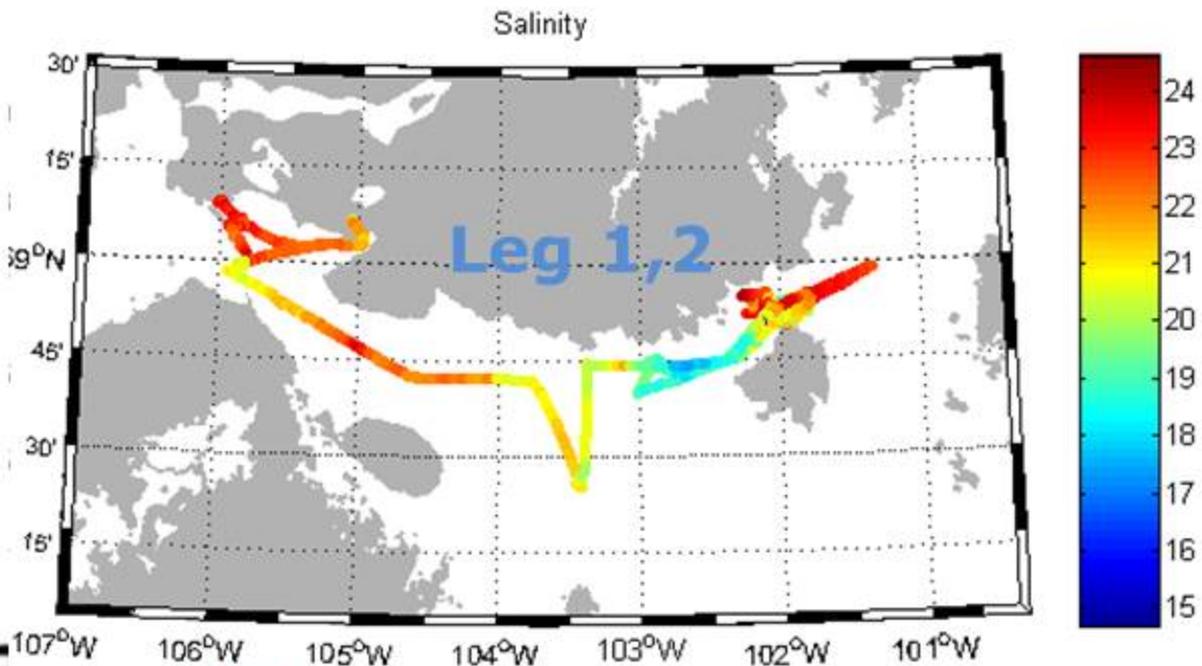

Biological hotspots:

Search for areas where upwelling brings nutrient rich water into the photic zone – traditional knowledge & science working together

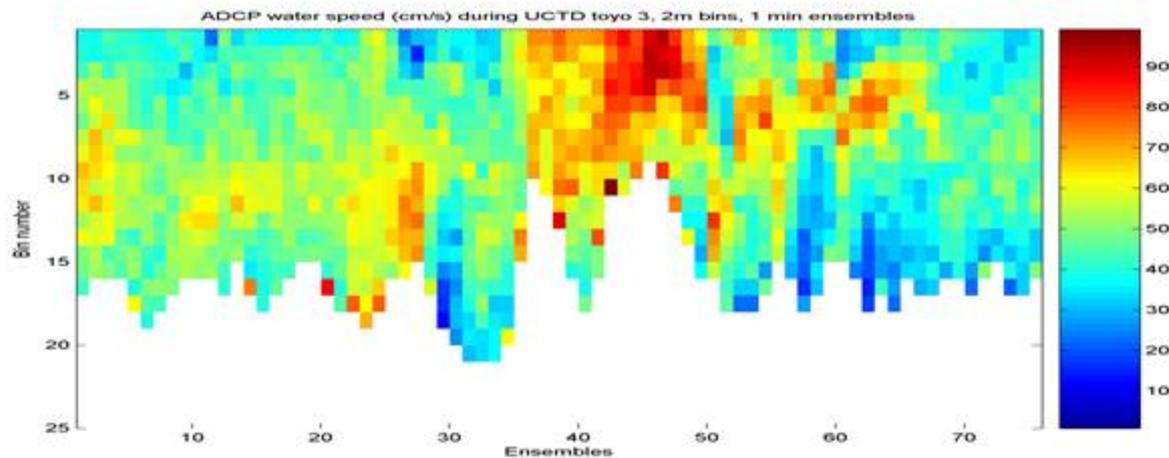

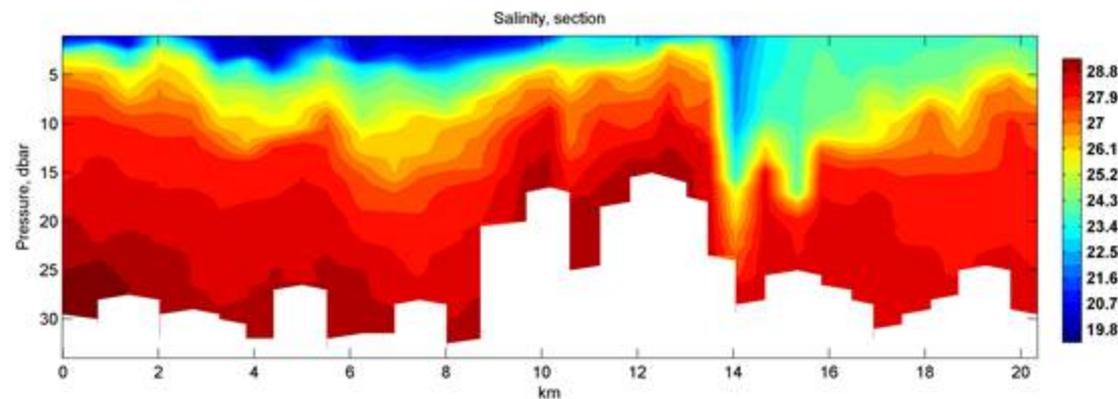

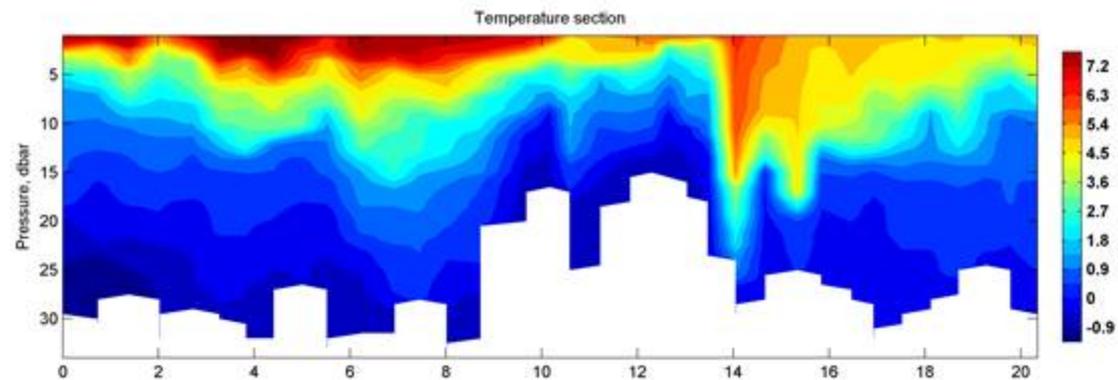

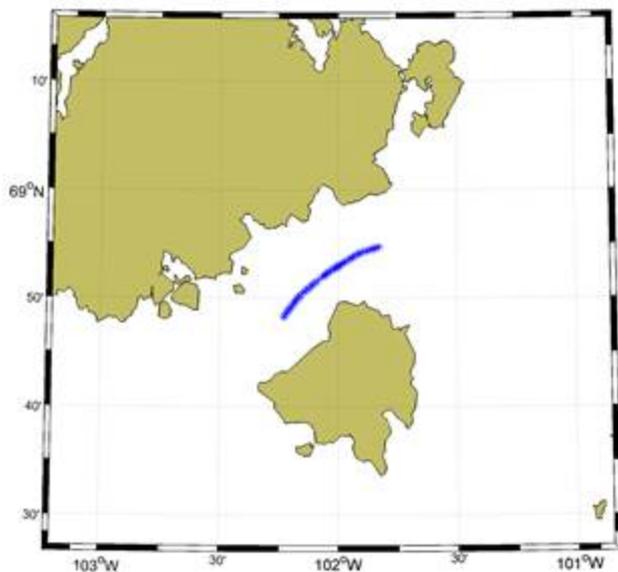

Kitikmeot Sea Science Study (K3S)
R/V Martin Bergmann
mid-August to mid-September 2019

Ship track and underway salinity

UCTD section in Icebreaker Channel

The Barrow Strait Monitoring Program and Real-time ocean observatory

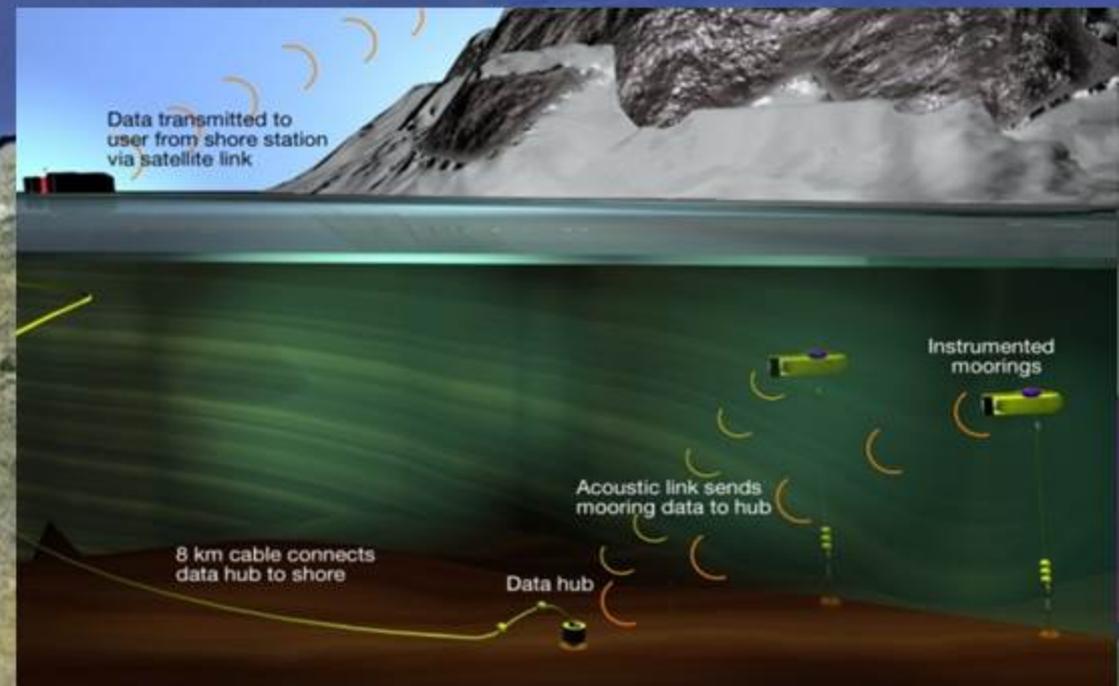

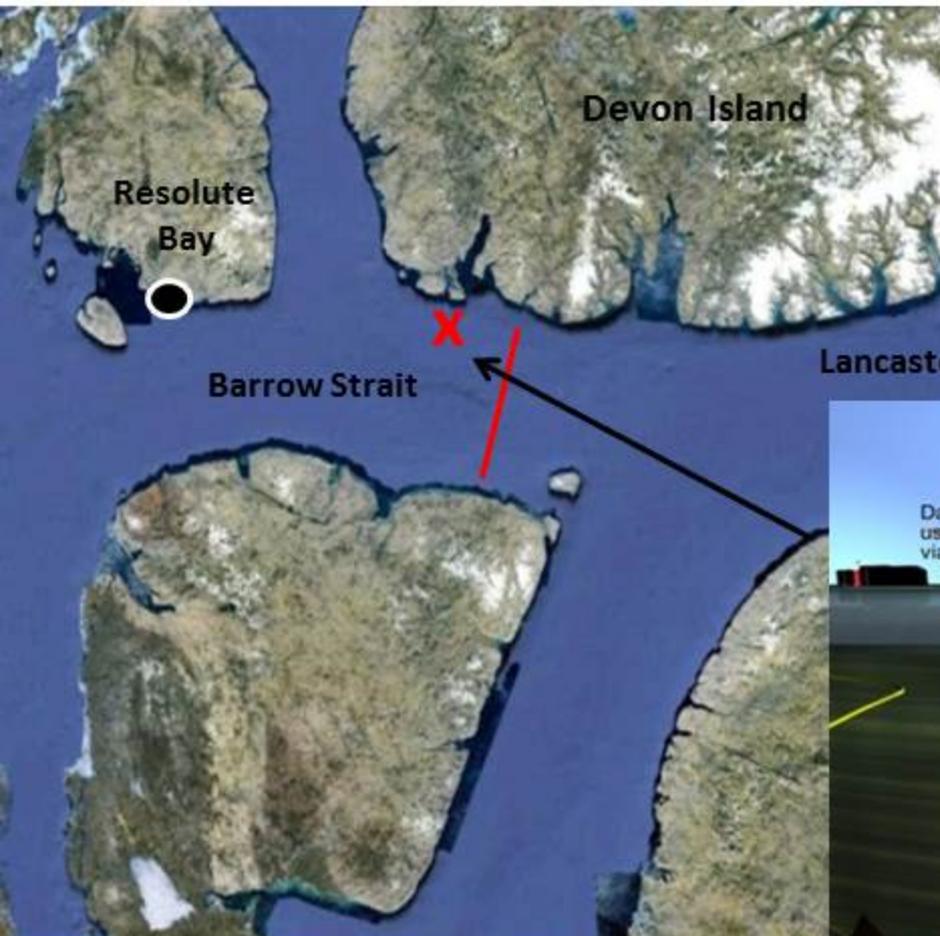

Clark Richards,
Bedford Institute of Oceanography

Fisheries and Oceans
Canada

Pêches et Océans
Canada

- Originally maintained from 1998 to 2011.
- **Re-deployed in August 2017.**
- **Turned-around August 2019 for 2 years**
- **Principle objective:** To quantify freshwater and volume transports into the NW Atlantic.
- Measurements of water properties, currents, and ice draft, passive acoustics.
